

**Amendments to the Claims**

This listing of claims will replace all prior versions, and listings, of claims in the Application:

**Listing of Claims:**

5/9/07  
C1  
Claim 1 (Original): A method of accessing instant messaging from a telephone comprising the step of:

presenting to a telephone user a subset of a predetermined user list, the subset representing users logged onto a data network;

responsive to the telephone user selecting a particular user from the subset of the predetermined user list, sending a message from the telephone user to the selected data network user using an instant messaging protocol.

A1  
Claim 2 (Original): A method as claimed in claim 1 wherein the step of presenting occurs upon receipt of a predetermined command from the telephone user.

Claim 3 (Original): A method as claimed in claim 2 wherein the step of presenting includes voice synthesizing names on the user list.

Claim 4 (Original): A method as claimed in claim 2 wherein the step of presenting includes playing back prerecorded names on the user list.

Claim 5 (Original): A method as claimed in claim 2 wherein the step of presenting includes displaying names on the user list on a display associated with the telephone.

Claim 6 (Original): A method as claimed in claim 1 wherein the step of presenting occurs automatically upon login by the telephone user.

Claim 7 (Original): A method as claimed in claim 6 wherein the step of presenting includes voice synthesizing names on the user list.

Claim 8 (Original): A method as claimed in claim 6 wherein the step of presenting includes displaying names on the user list on a display associated with the telephone.

Claim 9 (Original): A method as claimed in claim 6 wherein the step of presenting includes playing back prerecorded names on the user list.

Claim 10 (Original): A method as claimed in claim 1 wherein the step of selecting includes the step of receiving a DTMF command from the telephone user.

Claim 11 (Original): A method as claimed in claim 1 wherein the step of selecting includes the step of receiving a voice command from the telephone user.

AI  
Claim 12 (Original): A method as claimed in claim 1 wherein the step of selecting includes the step of receiving a proprietary signal from the telephone.

Claim 13 (Original): A method as claimed in claim 1 wherein the step of sending a message includes recording and sending a voice message.

Claim 14 (Original): A method as claimed in claim 1 wherein the step of sending a message includes sending a prerecorded voice message.

Claim 15 (Original): A method as claimed in claim 1 wherein the step of sending a message includes sending a prerecorded text message.

Claim 16 (Original): A method as claimed in claim 1 wherein the step of sending a message includes sending a text transcription of a voice message.

Claim 17 (Original): A method as claimed in claim 1 further comprising the steps of receiving an instant message in response the message sent by the telephone user and notifying the telephone user of the receipt of the message.

Claim 18 (Original): A method as claimed in claim 1 wherein the step of sending a message includes the telephone user's telephone number and a duration of time the telephone user will be available at that number.

Claim 19 (Original): A method as claimed in claim 18 further comprising the steps of, during the duration of time, receiving an instant message in response the message sent by the telephone user and notifying the telephone user of the receipt of the message at the telephone user's telephone number.

Claim 20 (Original): A method as claimed in claim 1 wherein the step of presenting includes the steps of first determining whether the telephone user is logged onto the data network and if not then presenting the user list.

AI  
Claim 21 (Original): A method as claimed in claim 20 wherein the step of determining whether the telephone user is logged onto the data network includes determining if the telephone subscriber is a personal communications subscriber and, if the user is, maintaining a presence in the data network for the telephone user for receiving and forwarding instant messages to the telephone user.

Claim 22 (Original): Apparatus for accessing instant messaging from a telephone comprising:

- an telephone interface for connection to a telephone network;
- an data interface for connection to a data network; and
- a messaging module for presenting a user list of active data network users to a telephone user via the telephone interface and responsive to the telephone user selecting a particular user from the user list, sending a message from the telephone user to the selected data network user via the data interface using an instant messaging protocol.

Claim 23 (Original): Apparatus as claimed in claim 22 wherein the messaging module includes a call-back feature for notifying the telephone user when an instant messaging reply is received for the telephone user.

Claim 24 (Original): Apparatus as claimed in claim 22 wherein the data network is a local area network (LAN).

Claim 25 (Original): Apparatus as claimed in claim 22 wherein the data network is a wide area network (WAN).

Claim 26 (Original): Apparatus as claimed in claim 22 wherein the data network is an intranet.

Claim 27 (Original): Apparatus as claimed in claim 22 wherein the data network is an internet.

AI Claim 28 (Original): Apparatus as claimed in claim 22 wherein the messaging module is a portion of a voice messaging system in the telephone network.

Claim 29 (Original): Apparatus as claimed in claim 22 wherein the messaging module is a portion of a server in the data network.

Claim 30 (Original): Apparatus as claimed in claim 22 wherein the messaging module is a portion of a voice messaging system within a personal computer connected to the data network.

Claim 31 (Original): Apparatus as claimed in claim 22 wherein the messaging module is a portion of a voice messaging system coupled to the telephone network.

Claim 32 (Original): Apparatus as claimed in claim 22 wherein the messaging module is a portion of a telephone network service.

Claim 33 (Original): A method of accessing instant messaging on the data network at a telephone comprising the steps of:

- identifying a subscriber, a telephone number at which they can receive messages, and a period of time for which they can receive messages at this number;
- establishing the user's presence and ability to receive instant messages on the data network during the specified time period;
- where an instant message is sent to the subscriber during this period of availability, calling the subscriber at the predetermined telephone number and delivering the message.

Claim 34 (Original): A method of accessing instant messaging on a data network at a telephone comprising the step of:

identifying a telephone user as a subscriber, a telephone number at which they can received messages, and a period of time for which they can receive messages at this number.

establishing the subscriber's presence and ability to receive instant messages on the data network during the specified time period;

presenting to the subscriber a subset of a predetermined user list, the subset representing users logged onto a data network;

responsive to the subscriber selecting a particular user from the subset of the predetermined user list, sending a message from the subscriber to the selected data network user using an instant messaging protocol.

Claim 35 (Original): A method as claimed in claim 34 wherein the step of presenting occurs upon receipt of a predetermined command from the subscriber.

Claim 36 (Original): A method as claimed in claim 35 wherein the step of presenting includes voice synthesizing names on the user list.

Claim 37 (Original): A method as claimed in claim 35 wherein the step of presenting includes playing back prerecorded names on the user list.

Claim 38 (Original): A method as claimed in claim 35 wherein the step of presenting includes displaying names on the user list on a display associated with the telephone.

Claim 39 (Original): A method as claimed in claim 34 wherein the step of presenting occurs automatically upon login by the subscriber.

Claim 40 (Original): A method as claimed in claim 39 wherein the step of presenting includes voice synthesizing names on the user list.

Claim 41 (Original): A method as claimed in claim 39 wherein the step of presenting includes displaying names on the user list on a display associated with the telephone.

AI  
Claim 42 (Original): A method as claimed in claim 39 wherein the step of presenting includes playing back prerecorded names on the user list.

Claim 43 (Original): A method as claimed in claim 34 wherein the step of selecting includes the step of receiving a DTMF command from the subscriber.

Claim 44 (Original): A method as claimed in claim 34 wherein the step of selecting includes the step of receiving a voice command from the telephone user.

Claim 45 (Original): A method as claimed in claim 34 wherein the step of selecting includes the step of receiving a proprietary signal from the telephone.

Claim 46 (Original): A method as claimed in claim 34 wherein the step of sending a message includes recording and sending a voice message.

Claim 47 (Original): A method as claimed in claim 34 wherein the step of sending a message includes sending a prerecorded voice message.

Claim 48 (Original): A method as claimed in claim 34 wherein the step of sending a message includes sending a prerecorded text message.

Claim 49 (Original): A method as claimed in claim 34 wherein the step of sending a message includes sending a text transcription of a voice message.

Claim 50 (Original): A method as claimed in claim 34 further comprising the steps of receiving an instant message in response the message sent by the telephone user and notifying the telephone user of the receipt of the message.

Claim 51 (Original): A method as claimed in claim 34 wherein the step of sending a message includes the telephone user's telephone number and a duration of time the telephone user will be available at that number.

Claim 52 (Original): A method as claimed in claim 50 further comprising the steps of, during the duration of time, receiving an instant message in response the message sent by the telephone user and notifying the telephone user of the receipt of the message at the telephone user's telephone number.

Claim 53 (Original): A method as claimed in claim 34 wherein the step of presenting includes the steps of first determining whether the telephone user is logged onto the data network and if not then presenting the user list.

Claim 54 (Original): A method as claimed in claim 53 wherein the step of determining whether the telephone user is logged onto the data network includes determining if the telephone subscriber is a personal communications subscriber and if the user is, maintaining a presence in the data network for the telephone user for receiving and forwarding instant messages to the telephone user.
